Wall Mount Instructions Space Shuttle Carrier – (10360)

Fit the wall plugs into your wall using the spacing of the two mount points. Then Install the wall screws.

Do not over tighten (do not use a drill to tighten).

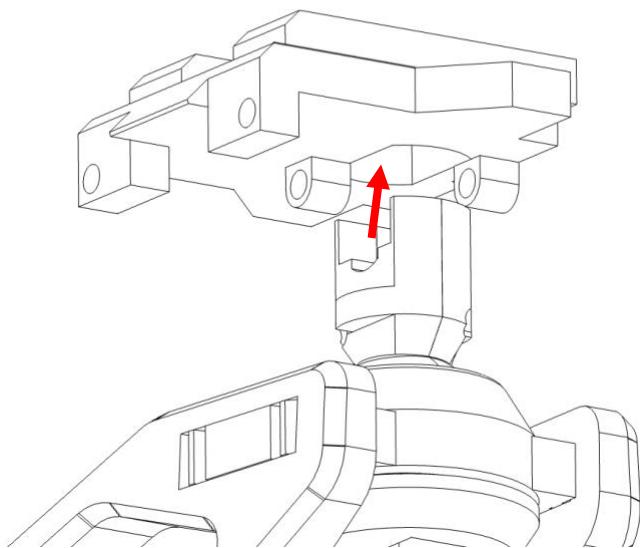

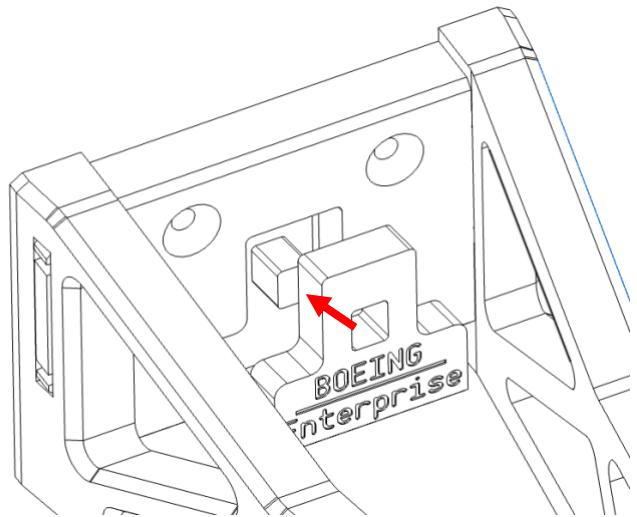

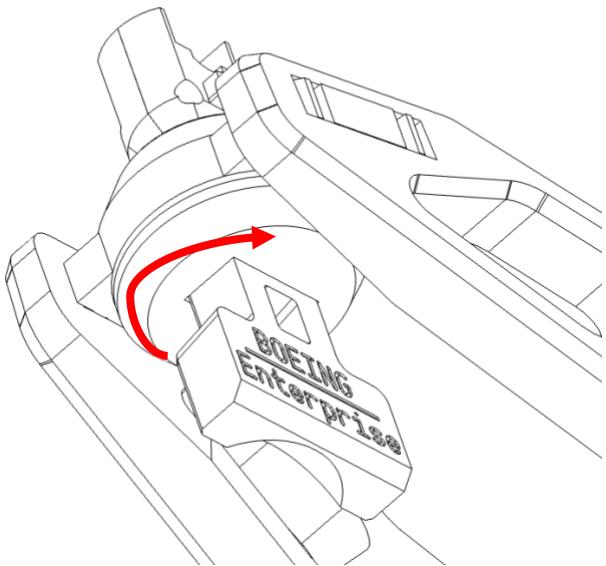

Feed the ball joint through the lower stretcher and screw the ball joint cap on to secure it in place.

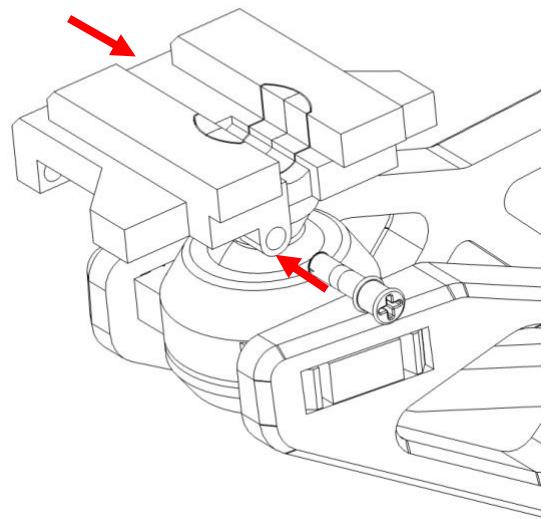

GECKO BRICKS

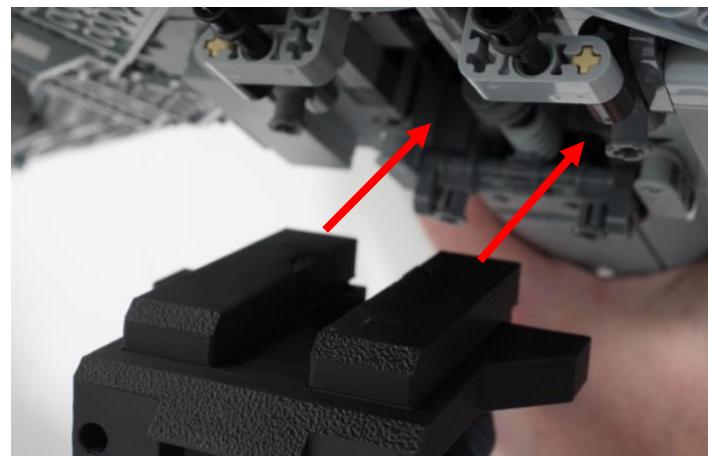

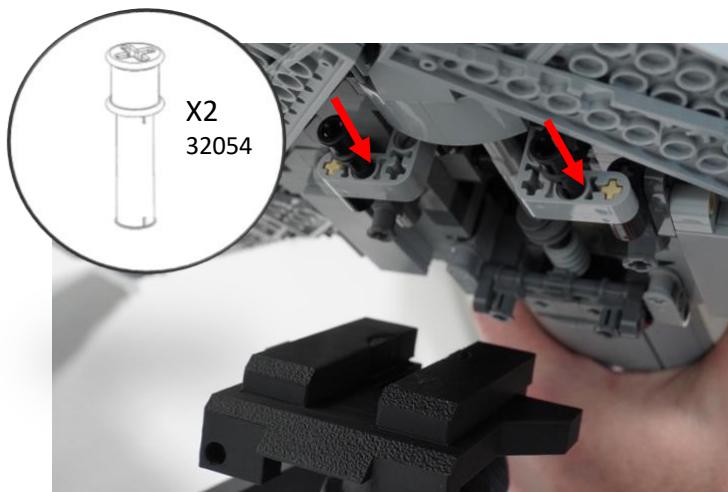

Wall Mount Instructions Space Shuttle Carrier – (10360)

Insert the pins on both sides

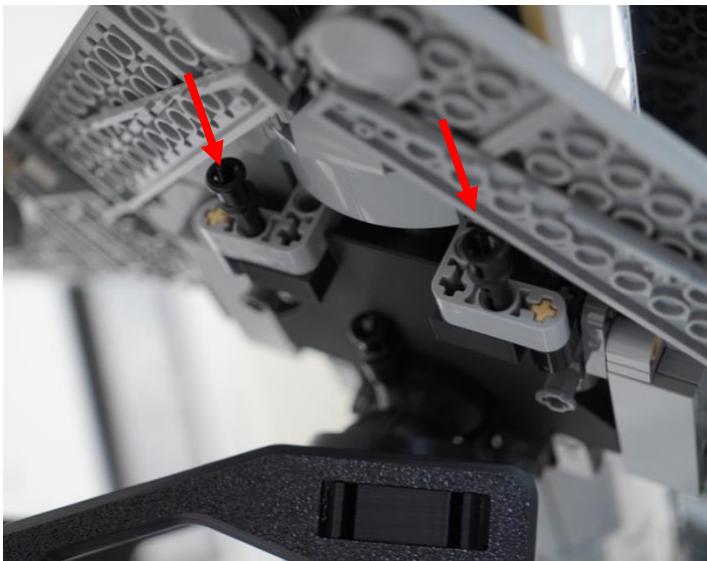

Next, lower the landing gear and remove the four wheel parts from the model

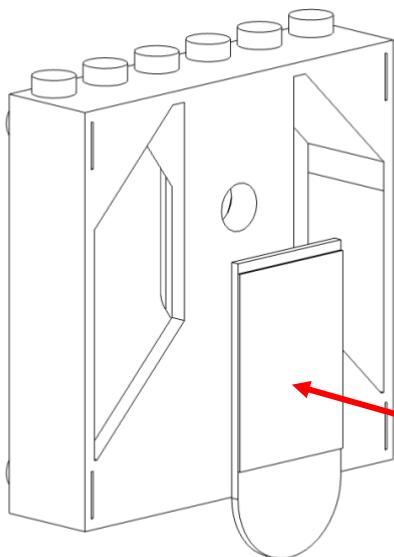

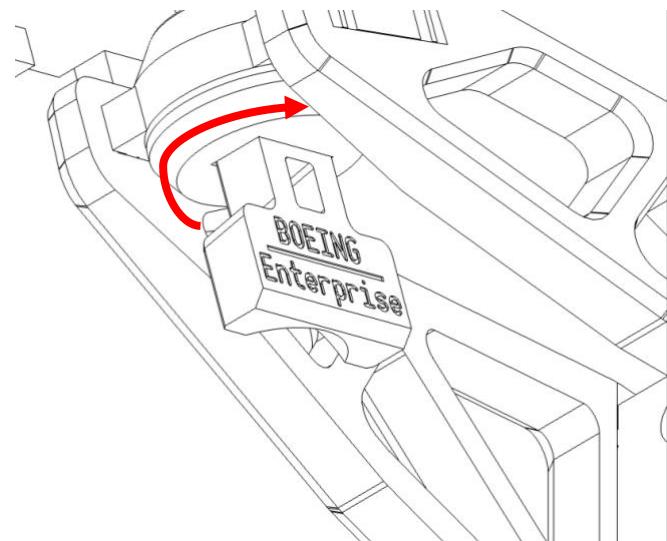

Wall Mount Instructions Space Shuttle Carrier – (10360)

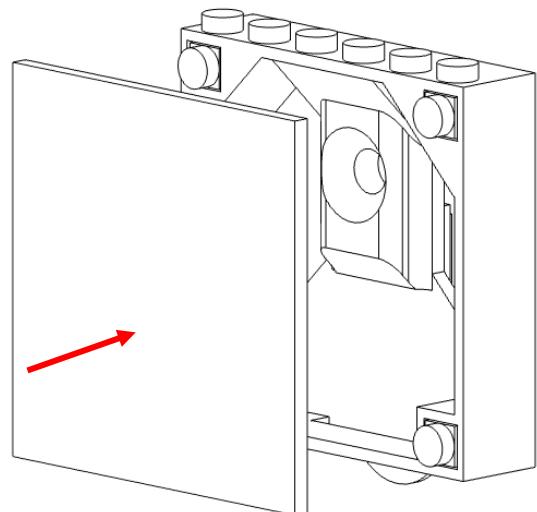

Push both pins through the Lego and into the adaptor to fully secure

Position the set and then fully tighten the locking nut

Once secured to the wall with the command strip, place the info tile into the mount
